Innovative Full-Stack Developer with over 5+ years of experience delivering high-quality software solutions across diverse industries. Proficient in leading the development of scalable web applications, integrating cutting-edge technologies, and enhancing system performance.

Adept at collaborating with cross-functional teams to meet business goals and ensuring optimal user experiences. Expertise in Java, PHP, AWS, and automated testing frameworks like Cypress.

Work Experience

Business Integration Analyst
12/2022 - Present

Accenture Solutions Sdn. Bhd. | Federal Territory of Kuala Lumpur, Malaysia

Finance & Accounting

Key Qualifications & Responsibilities:

- Developed batch jobs with 50+ layouts, ensuring reliable data processing and transformation.
- Integrated AWS services to optimize workflows, enhancing system scalability.
- Deployed applications across various environments, ensuring stable performance.
- Collaborated across teams to ensure smooth integration of batch processes.
- Implemented metric logging to improve log readability and system monitoring, enabling faster issue detection and resolution.
- Refactored batch processing code for greater extendability and maintainability, allowing for future scalability.

Key Achievement:

- Enhanced system scalability through AWS integration and code refactoring. Earned High Velocity Recognition for delivering high-quality solutions under tight deadlines while improving logging and system transparency.

DevOps

Key Qualifications & Responsibilities:

- Developed CI/CD pipelines integrating Bitbucket, Jenkins, Cypress, and SonarQube.
- Automated deployment processes to ensure consistent, high-quality releases.

Key Achievement:

- Reduced deployment time and minimized errors through pipeline automation.

Healthcare

Key Qualifications & Responsibilities:

- Managed a team to deliver critical healthcare solutions on tight timelines.
- Developed AnIML converter plugins with 100% unit test coverage.
- Integrated Textract to enhance image data processing accuracy.

Key Achievement:

- Increased data processing accuracy through Textract integration.

Business Integration Analyst

Telecommunications

Key Qualifications & Responsibilities:

- Led the development of telco plans, including 5G, through user-friendly platforms.
- Designed RESTful APIs for seamless integration across Android and iOS platforms.
- Implemented Cypress for automated testing, maintaining high-quality standards.

Key Achievement:

- Enhanced the plan purchasing process, reducing customer service inquiries

Back End Developer

11/2020 - 11/2022

The Lorry Online Sdn. Bhd. | Shah Alam, Selangor, Malaysia

Key Qualifications & Responsibilities:

- Developed and maintained new features for multiple products using PHP, ensuring seamless integration and performance across platforms.
- Refactored code to support multi-country operations, improving performance and scalability through the implementation of SOLID principles.
- Integrated AWS services and payment gateways, enhancing system reliability and providing secure transaction capabilities.
- Implemented automated testing frameworks like PHPUnit and Cypress to ensure high-quality releases and minimize post-production issues.

Key Achievement:

- Successfully implemented multi-country operations, resulting in improved performance and an expanded user base across regions.

Software Programmer

04/2019 - 10/2020

BizAid Technologies Sdn. Bhd. | Bangsar, Kuala Lumpur, Malaysia

Key Qualifications & Responsibilities:

- Led a team in developing and maintaining OCR & NLP financial statement modules, enhancing the system's data processing capabilities.
- Managed Selenium testing automation, improving processing time and reducing human error through effective integration testing.
- Implemented REST API integrations like iMacros and Textract, increasing system functionality and generating additional revenue.
- Provided IT support, managing network infrastructure and ensuring smooth operation across departments.

Key Achievement:

- Increased monthly revenue by successfully implementing key API integrations, contributing to product enhancement and client satisfaction.

Skills

Programming Languages
- Java, PHP, JavaScript, SQL, VB, Python

Frameworks
- Spring Boot, Laravel, CodeIgniter, React, Cucumber

Testing
- Automated Testing with Cypress, Selenium, PHPUnit

Tools
- Docker, VMware, Jenkins, SonarQube, Bitbucket, Rundeck, Technical Documentation (Postman, Swagger), K8

DBA
- MySQL, MSSQL

Cloud Services
- AWS - Lambda, S3, SQS, ECS, CloudWatch, Redshift

Other
- API Development, CI/CD, RESTful Web Services, Version Control (Git)

Achievements

Certified Professional Requirements Engineer (CPRE-FL)
01/2017 - Present
Credential ID ATC1001761

Android Certified Application Developer
10/2017 - Present
Credential ID MY-CPRE-FL-2017-00007

Education

Bachelor Of Software Engineering (Information System) | **Universiti Kebangsaan Malaysia (UKM)**
Bangi, Selangor, Malaysia
2015 - 2019

Interests

- Cloud Computing
- DevOps
- Machine Learning
- Microservices Architecture
- Artificial Intelligence
- Ethical Hacking
- Computer Hardware
